Dear Sir or Madam:

Please accept this letter of recommendation for R.L. Wiley Electrical Contractors, Inc. for your project(s) of interest.

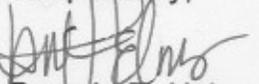

It has been a great pleasure working with Wiley Electrical over the past five years. This electrical firm has provided quality workmanship on a multitude of complex healthcare projects. From our Post Anesthesia Care Unit and new Ambulatory Surgery Center to a Cardiology Cath Lab and the new PET/CT suite, Wiley Electrical has been there to serve our needs.

All projects completed by R.L. Wiley Electrical have been fairly priced. They do not actively seek change orders after contract award. Their on-site staff has received OSHA 10 hour and 30 hour certification we require and are also trained in Infection Control during construction. The office staff is also responsive to our needs with all paperwork done in a timely manner. Certified payrolls, daily logs, safety inspection forms, and requests for payment are processed on time without worry or the need for follow-up.

On a personal note, my family has known Robert for over 20 years. His parents instilled in him a strong work ethic which is reflected in his work today. Robert has a great sense of humor which helps to make work light.

I look forward to working with this company for many more years and wish them continued success in their endeavors. Should you have any questions or concerns about their work performance, feel free to contact me at 706-733-0188, extension 3357.

Respectfully,

Pamela R. Helms
Project Manager
